### Just The Angle Needed For Landscaping Professionals

Little Wonder offers the ideal landscaping tool to trim hedges, tame tall bushes, sculpt shrubs and clear low lying brush at any angle. The Extended Reach Hedge Trimmer is a versatile landscaping tool with dual-reciprocating, double-edge, high-carbon steel blades that slice effortlessly through growth up to one half-inch thick at blade speed of 4900 cuts per minute in any direction. It's the only trimming tool with 180-degree blade rotation and infinite locking positions, making high hedges easy to tame from the ground and low-lying brush can be cut from a comfortable upright position. No more squatting and bending, or climbing a ladder to reach those tough spots.

The Extended Reach Hedge Trimmer is powered by a 22.5 cc commercial grade engine, which is positioned to divert exhaust away from the operator and features an electric ignition, 1/2 throttle lock, and purge pump carburetor for easier starting and grease fittings on the gearbox for added life. The Extended Reach Hedge Trimmer is exceptionally well balanced for ease of use and precision control in any blade position.

Little Wonder offers a short shaft model (Item No. 2300-00-01), which weighs a mere 12.9-pounds with a 36" shaft length and 25" double-edge blade. And a long shaft model (Item no. 2310-00-01), which weighs 14.2-pounds with a 60" shaft length and a 20" double-edge blade. The long shaft (60") model also features an exclusive "quick release system", which allows the operator to dismantle the unit or add an extension without tools. An optional 24" extension shaft with "quick release" knobs is available for the short shaft (36") model.

All Little Wonder products are constructed for heavy-duty daily usage and are designed with the professional user in mind.
