### Little Wonder Enhances High-Output Blower Line

**SOUTHAMPTON, PA (July 2004)** – Schiller-Pfeiffer, Inc., manufacturer of Little Wonder and Mantis Landscaping & Gardening Power Equipment, has enhanced the design of their Little Wonder High-Output Blowers. This fall, Little Wonder High-Output Blowers will feature 12” rear pneumatic tires and the gauge of steel used for the front cover and intake panel will be reduced to decrease unit weight and enhance maneuverability.

The Little Wonder High-Output Blower Line includes four powerful models: the 8 & 10 HP models feature Briggs & Stratton Intek IC engines and the 9 & 13 HP models feature Honda GX engines.

#### **Little Wonder High-Output Blowers Feature:**

- Comfortable cushion-gripped, height-adjustable, ergonomically designed handle
- Patented deflector that splits the air stream to make use of the fastest moving air
- Centrifugal blower design that works together with a reverse-inclined blade impeller creating a greater volume of air that moves at increased velocity (as compared to traditional flat-blade designs)
- Curved aerodynamic inlet that draws air in smoothly around the entire inlet area, ensuring adequate air intake even if part of the intake area is blocked by debris

*Little Wonder HO Blower Line - offers reduced weight and 12” pneumatic rear wheels (13 HP model shown).*

The newly re-designed units will be available through over 3,000 Little Wonder dealers nationwide in time for Fall 2004.
