Little Wonder Shredding TruckLoader Cuts Debris Handling Down to Size

Debris clean up is a time consuming, back breaking, labor intensive job faced by landscape contractors everyday. The Little Wonder Shredding TruckLoader can make short work of debris clean up, and is arguably the most efficient debris-handling tool available.

Durability, efficiency, power, safety and ease of use are well earned attributes of the Little Wonder Shredding TruckLoader. The frame is constructed of rugged, heavy gauge steel providing outstanding durability - yet is smartly designed with easy access to its powerful 16-hp Briggs & Stratton V-Twin engine. An advanced impeller and housing design facilitate smooth airflow for the highest flow rate, increased suction power, and significantly reduced noise levels offering quieter, more productive debris handling. One of the most attractive features of the Little Wonder TruckLoader is an exclusive five steel blade shredding Talon™ ring which, combined with its advanced impeller design, offer the highest reduction ratio available in any truck loader.

Little Wonder Shredding TruckLoader shown complete with standard hitch, boom, hose, and intake nozzle.

The Little Wonder Shredding TruckLoader also features a safety lockout switch that keeps the engine from starting when the intake hose is removed. The durable, user-friendly intake hose is easy to connect with only 2 knobs to adjust, and the double handle steel intake nozzle is designed to allow the nozzle to be flush with the ground when the hose is flat, making single-user jobs easier and more efficient.

The Little Wonder Shredding TruckLoader is guaranteed against defects in material and workmanship for a period of One-Year when used for Consumer or Commercial service. All Little Wonder products are designed with the professional user in mind and are engineered for heavy-duty daily usage.
